CURRENT COMMENTS

IMPORTANT TO FARMERS AND THRESHERS

An act of interest to all farmers,
threshermen and threshers' em-
ployees came into force in March
last, and for the benefit of those
most interested we publish what
we think is the most essential in
the new law:

Anyone working on a threshing
machine may now collect his wages
direct from the farmer. In
former years, it has been a grievance
of many threshing crews,
that after their employer had
used up all his money or a
machine company has taken an
assignment of his earnings, then
the crew could not collect their
wages.

From now on, anyone working
in a threshing crew has first claim
to the earnings of the machine
for wages earned while on the job.
He must, while the job is being
done, notify the farmer for whom
they are threshing, of his claim,
or else, within ten days after it is
finished, hand him a notice in
writing, giving full particulars of
himself and his claim. The farmer
getting such notice will hold the
money thirty days after the job
is done, then if no dispute is
filed by the thresher, pay the
money direct to the man who
claims it.

The farmer who employs a
thresherman must look out for
all wage claims. Either he, or
any of the crew, may at any time
demand a statement from the
thresherman showing just how much
is due the crew for wages. After
he gets this the farmer must hold
back enough to cover all the wage
claims until ten days after the job
is finished. If he goes ahead
paying the thresherman without
inquiring about the wages of the
crew, he may find himself liable
to pay his thresherman twice,
with little prospect of getting any
of money back.

Unless the farmer, therefore,
has a written statement from his
thresherman, showing all wages
paid he should never pay up the
threshing in full. If this state-
ment shows any wages not paid
he should hold back for ten clear
days after the threshing is finished
the amount of such unpaid
wages.

If he gets no notices of claims
from the crew within those ten
days he may pay up the thresher-
man. If he gets any such notices
he must hold out enough to cover
the amount claimed till thirty
days after the threshing is ended.
If he gets no notice from thresher-
man within those thirty days
disputing the claim of the crew,
he can pay the man who claims
the money. If he does get such
notice from the thresherman, he
should pay the money into court.

The farmer is not liable to any
other creditors of the thresher
man who may serve him with
notices, garnishee summonses or
other papers.

A Men's Sewing Circle is to be
started in this neighborhood for
the winter months. Its motto
should be, "As a man sows, so
shall he rip."

THE THRESHING OF BARLEY

In view of the fact that many
of our farmers have gone exten-
sively into barley raising, the
following hints on threshing the
grain may be of some use to
them. The information has been
sent out in the form of a letter by
a large milling company in west-
ern Canada respecting the con-
dition in which they receive barley
and how it is affected by thresh-
ing, which is a very important
thing to the farmer to know. The
letter reads as follows:

The threshing season is close
upon again, and we think it would
be well if the attention of farmers
can be drawn to the importance
of properly threshing their barley
crop. During the past season we
have inspected samples of over
10,000 cars of barley arriving at
Winnipeg. Of these deliveries
we purchased upwards of 1,500,000
bushels, and in making our selec-
tions we were obliged to turn
down a great many cars that were
in every respect a very fine quality
of barley except that the grain
had been threshed too closely.
This short threshing of barley
not only breaks many kernels,
but injures the germ end of many
more, making it entirely useless
for either malting or seed pur-
poses.

After threshing wheat or other
grain, it would cost the farmer
nothing except a little care and
attention to have the cylinders
and concaves set properly for the
threshing of his barley, and thus
produce a quality that will secure
for him the highest possible market
value.

Owing to the increased cost of
manufacture, steel pens have gone
up in price. Note-paper and en-
velopes, however, still remain
stationary.

It was very Thaw-less of Harry
Thaw's lawyer to advise his client
to come to Canada, where stern
British law prevails.

The Countess of Aberdeen
says that the girl who tries to
return a drunkard by marrying him
has taken on a steady job.
It's the steady job that worries
her.

A lady of Richmond, Virginia,
has been fined \$25 by wearing a
skirt exposing a little bit too
much stocking. Another injustice
to woman. Even a cow is allowed
to show her calves.

If the farmer will follow the
turning plow with the right type
and will use the disc harrow
before and after plowing he
will have taken out an insur-
ance policy against crop failure.

From all over the west comes
reports of the harvest being in
full swing. The recent rains, it
is apparent, caused little actual
damage and the indications at
the moment are that, with this
danger period past, the work of
ingathering the crop will proceed
to a completion without serious
interruption. Despite the live
stock development, Alberta will
make a showing of grain produc-
tion much beyond previous re-
cords.

A severe thunder storm struck
Edmonton on Saturday and two
buildings struck by lightning.

Twenty-five per cent of the
25,000 women workers of Kansas
City receive less than \$6.00 per
week, the wage needed for a
"bare existence," according to a
report of the board of public
welfare, just made public.

Magistrate Alexander, who re-
cently held an investigation into
irregularities in the management
of Vancouver's schools, reported to
the government that many
thousands of dollars in public
funds had been thrown away by
lack of business management.

A goat will yield from one to
two quarts of milk daily, and
coats from \$2 to \$20; and ac-
cording to Dr. Sheldon W. Bull
of Buffalo, the goat is the only
dairy animal immune from tuber-
culosis. Furthermore, goat's milk
is richer, more nutritious, and
more easily digested than cow's
milk. Why not get a goat?

No, gentle reader, this isn't the
same old goat that was brought
into use at the recent initiation of
the new members of the I.O.O.F.
lodge. That one was a critter of
another breed.

Under date of August 15th, Mr.
J. W. Wheaton, one of the oldest
and most experienced agricultural
editors in Canada, wrote in the
Canadian Farmer:

"What will the harvest be? At
this date it is impossible to say
with exactness. A recent govern-
ment estimate for Saskatchewan
places the wheat yield for that
province at 125,000,000 bushels.
If this be taken as an indication
of what the west will do, then the
1913 crop will be something to
talk about. The other two prov-
inces should bring the total
close to 200,000,000 bushels, if
not over that figure. In a week
or two the anxious time will have
passed, and whether a record
breaker or not, the western yield
will be a fixture for this season."
Eleven days have passed since
this was written and have been
for the most part, days that have
helped a very great deal in mak-
ing the harvest "something to
talk about."

The editor received this letter
from a youth:

"Kindly tell me why a girl al-
ways closes her eyes when a
fellow kisses her."

The editor replies:
"If you will send me your
photograph, we may be able to
tell you the reason."

Willie: Say, pa, didn't you tell
me the other day that it was very
wrong to strike anyone smaller
than myself?

Pa: Yes, Willie, that's what I
said.

Willie: Well, I wish you'd
write my teacher a note to that
effect. I don't think she knows
about it.

A school teacher was asking
her scholars if they could tell her
what part of the body was the
most illused.

One little boy snapped his fin-
gers, saying: Yes, mum, I know.
Teacher: Well, Tommy, what
is your answer?

Tommy: The eye.

Teacher: Why?
Tommy: Because it is under
the lash all day and gets a good
hiding at night.

FAVOR CO-OPERATION

REV. PRINCIPAL SCRINGER BE LIVES IN NEW SYSTEM.

Recent Merging of the Forces of the Presbyterian, Wesleyan, Diocesan and Co-Operational Colleges in the Theology. Has been a hard work. Say—He Has Worked—Hard to Bring Union of Colleges About.

Rev. Principal Scringer, of Montreal, is an enthusiastic admirer of the co-operative system of ecclesiastical teaching, inaugurated in that city a year ago by the Presbyterians, the Wesleyan, the Diocesan and the Congregational colleges, and is emphatically of the opinion that the new plan has, in an educational sense, and fully justified its adoption.

The faculty agreed by Dr. Scringer and the utmost harmony has prevailed among the professors until the students in theology and the classes have been much larger than has ever before been possible. The arrangements have been such that the students and teachers and any rivalry that has existed has been the most friendly kind and friendships have sprung up among students and professors and all are working in a happy degree of co-operation.

Dr. Scringer, who has been so successful in making the co-operative theological work successful, has been long an active worker in the Presbyterian circles in the Dominion and has been a member of the Wesleyan Presbyterian College for many years. There are several reasons why he considered the plan. Another is that the plan is a Government measure, for the Administration has not realized what gratitude was shown from all classes of the people who have been in favor of it.

It may well be asked why has not the plan been adopted in other parts of the Dominion? The answer is that it is a Government measure, for the Administration has not realized what gratitude was shown from all classes of the people who have been in favor of it.

PRESIDENT SUSPENDER

NONE SO EASY

Origin of the Calabash

The calabash used in pipes is an own cousin to the cucumber, the melon and the squash. It is a fruit of the family Cucurbitaceae. A British soldier had broken his pet bird, and the first calabash pipe was born, says the Cigar and Tobacco World. The pipe was green and did not burn, and it colored beautifully, so when the war was over Tommy Atkins returned to England with his pipe and a number of gourds. But the dried gourds turned out, and it was necessary to find them. Zinc was first tried, and proved unsatisfactory, and then mercuric iodine was employed as they are today.

Cold Storage Plants

Statistics issued by the cold storage branch of the department of agriculture, Ottawa, show that during the six years which have elapsed since the passage of the act to encourage the erection of cold storage warehouses, more than \$20,000,000 have been erected in different parts of the Dominion, and four more are at the present time under contract. No assistance has been given to any company proposing to build in places where cold storage facilities already exist.

The Reward of Kindness

A man going home at a late hour in the night saw that the occupants of a house standing back with the street had left a window up, and he decided to warn them, and perhaps prevent a burglary. Pulling his head into the window he called out: "Halloo! good people! That was all he said. A whole pallid of water struck him in the face, and as he staggered back a woman shrieked out: "Didn't I tell you what you would get if you wasn't home by 9 o'clock!"

Not a Difficult Job

A woman of efficient Hibernian ancestry recently called at a photographer's and arranged for a group picture of her two children, which she wished taken at her home, surrounded by the furnishings with which she was familiar.

When the photographer called with his camera there was but one youngster in evidence and he asked for the other one.

On replied his father, Michael, closed a year ago, but O can give you such a description of him that you can't fail to make a swell picture.

Painting the Royal Portraits

Mr. John Lavery has been recently recognized as one of our cleverest portrait painters and he has been honored by a commission to paint the new royal portraits. Both Queen Alexandra and the Duchess of Argyll are great admirers of his work, and are largely responsible for him securing the Royal commission.

Mr. Lavery is a native of Belfast and pursued his artistic studies in Glasgow, London, and Paris. He has pictures in all the foremost continental galleries, and also in the Canadian galleries in Montreal, Bradford, Glasgow and other big cities.

Sticking to Facts

A lady who goes into a library one afternoon at the door of the library one afternoon, where her mistress was reading. There's no coal man, said the maid, and the fire is going out. No coal, cried the mistress in surprise. Why didn't you tell me before?

I couldn't tell you there was no coal, ma'am, replied the girl, when there was coal.

Woe-den, Anyhow

The late Sir W. S. Gilbert was inclined to be witty at the expense of the men and women who live to do amateur acting in the name of charity. An enthusiast once said to him, Mr. Gilbert, what do you think of our amateur club?

I think they are not so much a club as a bundle of sticks, returned the master of ceremonies.

A boy who was passing the shop thought he had found a job at last when he saw a sign in the window: "Wanted. He went in and asked the proprietor about it.

You, said the storekeeper, I want a good, bright boy to be partly to do and partly outdoors.

That's all right, said the applicant, but was become of him when the door slams shut.

The late Judge Sir John A. Macdonald, the father of William J. Bryan, once had several lines stolen from his smoking room. He missed them at once but said nothing about it to anyone.

A few days later a neighbor came to him.

Say, Judge, he said, I heard you had some lines stolen the other night.

Yes, replied the Judge, very confidentially, but don't tell anyone, no and I am the only one who knows it.

Editor—Who was the first humorist? Author—Really don't remember. Editor—I thought you might, you have been bringing us in his jokes.

Laurel me congratulate you, Mrs. Boy, you have done it. I don't think Mr. Jones. You don't? But surely I must be near you. Why don't you think so? Because it's a beautiful little girl.

A Rejo

I have called, said the candidate to the man at the door, to find out if I can count on your support at the poll. — Half a minute, sir, growled the man, I am not a candidate. — I am not a candidate, said the man, I am not a candidate. — I am not a candidate, said the man, I am not a candidate.

The lamp was radiant over a recent addition to the news for a passing neighbor. Oh, you don't know what it is? It is a new baby brother! And we expect you to watch the delivery of her announcement. You don't say? — It is he going to say? I think so, very thoughtfully—He's got his finger off.

Mother—Oh, Bobby, you naughty boy, you've been smoking! (Pause). Poor, poor darling, do you feel very bad? Bobby (who has been well brought up). Yes, thank you, I'm dying.

Three hours later he received the following reply: — All right. He will be here.

I say, how is that new baby over at your house? It's a howling screech.

Not Entirely

Have you lived here all your life? asked a drummer of a lean, lantern jawed Tennessee mountaineer who stood idly leaning against a rail fence. The mountaineer shifted his weight from one foot to the other and replied: Not yet.

Mizzie's Liniment Cures Diphtheria. Barber (beginning the haircut)—Have you heard the story about the man that—(resuming business)—that it short, sir? Customer (a tired old fellow)—Yes, a more sympathetic will do!

The manager of a well-known touring company was to the proprietor of a theatre in a small town where his company was to appear. Would like to hold a rehearsal at your theatre at three o'clock to-morrow afternoon. Have your stage-manager, stage-proprietor, assistant stage-proprietor, property man, chief electrician and all stage hands present promptly at that hour.

Three hours later he received the following reply: — All right. He will be here.

I say, how is that new baby over at your house? It's a howling screech.

Always the Way

This is the truth, it is so just. As you yourself can plainly see, just give a man a day of rest.

And see how restless he will be. You are ninety-seven years old? Yes—What are your rules for reaching such an unusual age? I dunno as I have any in particular. Just keep on living, and you'll get there, young man.

No Escape

I thought that poor little hen-pecked man was going to take a trip for his health? He has changed his mind.

He found out that through the wonders of wireless telegraphy his wife could keep in touch with him every day.

Corus and wars disappear when treated with Holloway's Corn Cure without leaving a scar.

Jones—My wife and I suffer from alternate insomnia. Brown—Alternate insomnia! What is it? Jones—Whichever gets to sleep first keeps the other awake all night.

NA-DRU-CO Headache Wafers

Stop them in quick time and clear your head. They stop them when the pain is acute, and a powerful opium or any other dangerous drug. 25c a box at your Druggist's.

KEWAS, DRUGS AND CHEMICAL CO. OF CANADA, LIMITED.

Wanted to Know

About how much does an automobile outfit for a woman cost? Oh, my, are you going to buy an auto?

No, I just wanted to figure out how far beyond his means your brother Bill is living.

Angry Diller—Walter, you are not at all a slave pig. Walter—I am doing my best, sir.

Traveler—Why do you make the sandwiches so dreadfully small? Walter—We make 'em small sir, so you won't miss the train.

Mrs. Hubbard—My husband goes out every evening for a little constitutional. Does yours? Mrs. Gutzler—No, my husband always keeps it in the house.

Progress. Daughter, I asked the young men who are just telling you who you should be, or how to be, or what to do.

He said he knew the whole, but we all the steps.

Here, began a woman, how's an article in the paper on Woman's Work for the People's Mind?

He husband grinned. He knew what women have ever done for the female mind.

They usually marry them, dear, and spend his wife, mostly.

Modern Girl—I am really bored here all the time, why didn't you tell me that? Modern Youth—I couldn't tell a post card with the right words to the house.

HOW THE CANADIAN PACIFIC RAILWAY MAKES FOR THE PUBLIC & FOR THE MEN WHO TRAVEL ON THE PACIFIC.

DEMONSTRATION FARM STRATHMORE

A citizen of the world wishing to spend a holiday at home, in the heart of the Western Canadian Rockies or to make a business journey along the line of the Canadian Pacific Railway, has a choice of many beautiful and fertile lands and seas in luxurious surroundings with little idea of the various of the enterprise upon which he is entering. The Canadian Pacific Railway, one of the greatest transportation systems which mankind has ever known, is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known.

COMMUNITY BUILDING

It would take a great deal of space to tell how the Canadian Pacific Railway takes care of that part of the business which is the most important to the public. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's great transportation systems which mankind has ever known.

TAKING CARE OF THE PUBLIC.

It would take a great deal of space to tell how the Canadian Pacific Railway takes care of that part of the business which is the most important to the public. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's great transportation systems which mankind has ever known.

SECTION OF BAKING

It would take a great deal of space to tell how the Canadian Pacific Railway takes care of that part of the business which is the most important to the public. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's great transportation systems which mankind has ever known.

INTERIOR OF DINING CAR

It would take a great deal of space to tell how the Canadian Pacific Railway takes care of that part of the business which is the most important to the public. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's great transportation systems which mankind has ever known.

MURKIN FOR DINING CAR CREWS

It would take a great deal of space to tell how the Canadian Pacific Railway takes care of that part of the business which is the most important to the public. It is a system of the world's greatest transportation systems which mankind has ever known. It is a system of the world's greatest transportation systems which mankind has ever known.
